

## FAUNISTIC RECORDS FROM THE CZECH REPUBLIC - 68

---

### Lepidoptera:

#### Gelechiidae

*Athrips pruinosa* (Lienig & Zeller, 1846). Moravia mer., Radostín (6361), 3.vii.1995, 1 ♂, 28.vii.1996, 1 ♂, in light trap, J. Šumpich leg. et coll., G. Elsner det. A tyrphobiontic species. In the Czech Republic known only from several Bohemian peat-bogs (Klimesch 1976, Spitzer & Jaroš 1993, Vávra et al. 1996). New species for Moravia.

*Bryotropha similis* (Stainton, 1854). Bohemia or., Rašovice (5862) near Týniště nad Orlicí, 15.vii.1995, 1 ♂ (genitalia examined), at light, J. Šumpich leg. et coll., G. Elsner det. Widely distributed species with uncertain taxonomic status. In Moravia published from Štramberk (Janovský & Gottwald 1990). New species for Bohemia.

*Syncopacma cinticulella* (Bruand, 1850). Bohemia or., Skuteč (6162), 7.viii.1995, 1 ♂ (genitalia examined), at light, J. Šumpich leg. et coll., G. Elsner det. Recorded from all neighbouring countries (Karlsholt & Riedl 1996), in the Czech Republic mentioned from Moravia and Bohemia (Laštůvka et al. 1993, Sterneck & Zimmermann 1933), but the records are old and not revised. The first reliable record of this species from the Czech Republic.

#### Noctuidae

*Calyptra thalictri* (Borkhausen, 1790). Syn.: *C. capucina* (Esper, 1789). [Bohemia or.], Hradec Králové (5861), 18.vii.[18]87, 1 ex. (unsexed), ?? leg., M. Mikát et J. Šumpich det., coll. Regional Museum of Eastern Bohemia at Hradec Králové. The original locality label contains only „18.7.87 NKG TZ“ [= Neukönigrätz = Hradec Králové, Czech mapping square 5861]. In the Czech Republic is recently known only from South Moravia (Králíček & Gottwald 1985, Laštůvka 1994). The specimen proves the past presence of this species in the territory of Bohemia.

*Calocestra microdon* (Guenée, 1852). Syn.: *C. marmorosa* (Borkhausen, 1792). [Moravia mer.], Konice (7162), 20.vi.1986, 1 ex. (unsexed), K. Jordán leg. et det., J. Šumpich revid., coll. Regional Museum of Eastern Bohemia, Hradec Králové. Locally distributed species preferring sunny slopes of middle and higher altitudes. Known from almost all neighbouring countries - Germany, Austria, Hungary, Slovakia (Hering 1932, Huemer & Tarmann 1993, Forster & Wohlfart 1980, Pastoralis & Reiprich 1995). From Slovakia reported already by Hrubý (1964) without any precise data. The first reliable record from Slovakia published by Králíček (1977) from Gaderská and Kvačanská valleys. From Moravia published by Skala (1912-1913), the record being considered as doubtful by Laštůvka et al. (1993). In the Czech Republic some older unreliable record from West Bohemia known (I. Novák, pers. comm.). One specimen from South Moravia with the locality data “Třebíč, dr. Sova” is also housed in the collection of G. Elsner (G. Elsner, pers. comm.). The first reliable record of this species from the Czech Republic.

*Euxoa crypta* (Dadd, 1927). Syn.: *E. brunnea* (Hufnagel, 1766). Bohemia or., Rašovice (5862) near Týniště nad Orlicí, 18.viii. 1995, 1 ♂ (genitalia examined), at light, J. Šumpich leg., det. et coll. Atlantico-mediterranean species with European distribution. It has been recorded from Germany, Hungary, Denmark, France and Spain (Fibiger 1990), also from Slovakia (Králíček 1992) and Moravia (Laštůvka et al. 1993). Taxonomically difficult species, externally similar to *E. tritici* (Linnaeus, 1761). The specimen was collected in a pine wood on sand base. This biotop corresponds with ecological characteristics of this species. New species for Bohemia.
